High Quality Self-Checking monitor

- ◆ Compare to self-reversing monitor ,self-checking monitor is normal display . The speaker can watch their own status at any time and let speech display the perfect video status .
- ◆ The teleprompter screen adopts a wide viewing angle LED screen with 1920*1080 resolution, and the viewing angle can reach 140° horizontally and 130° vertically. At the same time, to meet the needs of different users, the teleprompter screen provides 250cd/m2 brightness standard screen and 1000cd/m2 high brightness screen. A variety of specifications for users to choose.

Multi-functional interface display

- ◆ The teleprompter screen adopts the Linux embedded integrated host display design, and provides multiple input and output interfaces such as HDMI, VGA, USB,..... etc.
- ◆ The teleprompter host is embedded in the screen, and the broadcast document can be directly read without an external computer. Notebook or desktop computer, switch to mirror mode for broadcasting, and support paper file collection to teleprompter for broadcasting.

TELEPROMPTER SOFTWARE AND DONGLE

For 20/22/24inch

- ◆ The system supports linux, Windows 7, Windows 8 and Windows 10 systems.
- ◆ The system requires any combination of character color and background color with 256 colors. Male and female announcers can choose different background colors and character colors to facilitate male and female announcers to choose their own words, fonts and word sizes, and multiple roles are available , To distinguish between male and female roles or more broadcast roles.
- ◆ Convenient manuscript entry and editing, simple operation, automatic typesetting, supports txt, rtf, word and other format texts, and supports direct opening of pictures, word, PPT, videos and other files.
- ◆ Adopting monitor and high-resolution color display respectively, with high definition and clear writing. Can be combined with document camera to form a three-in-one type. It is suitable for the needs of recording and live broadcasting programs of various TV stations. The script is bright and clear, and supports customizing the font size, font, and color display of different roles.
- ◆ The teleprompter mirror display, built-in teleprompter host, can directly run and read the broadcast manuscript in the U disk, and can also set up an external laptop or desktop computer for broadcast use.
- ◆ Paragraph format, bullets, indentation and line spacing can all be set. Date and time are inserted into the presentation at any time.
- ◆ The software supports Chinese, Tibetan, Mongolian, Dai, Uighur, Korean and other minority languages. It also supports some foreign languages such as English, Japanese, Korean, German, Russian, French, Arabic and other national languages (some languages can be added according to customer requirements).
- ◆ The system automatically records the presentation, and when the power is turned on after an abnormal power failure, it will automatically search for and open the presentation, and ensure the integrity of the presentation.
- ◆ The relative scrolling time and current time can be displayed on the same screen, and the size and color can be set arbitrarily, which is clear at a glance and easier to grasp the rhythm; important sentences can be marked by color.
- ◆ More detailed, convenient and practical for the information bar, update time, and broadcasting speed.
- ◆ The content is updated in real time, the update process is broadcast without interruption, no flashing, and the update speed is fast.
- ◆ The control method is flexible and diverse, keyboard, mouse, and control handle are all available. The range of subtitle speed can be adjusted at will, and it is convenient to skip back and forth to turn pages. The travel speed of the announcement can be controlled by the announcer through the handle, and can be controlled by single or double , Convenient and free.
